

## Transportation Exploration

### NLX stations –

- park and rides
- bus stops
- Uber / Lyft
- Bicycles
- Updates

### Uber/Lyft:

Robyn Bernardy – Co-Meeting with Lyft's Chapin Hansen?  
Social Media Ask – Who are the region's Lyft and Uber Drivers?

### Other Modalities:

Other forms of transportation in smaller areas – such as bicycle rentals.

Adaptable Bicycles with front seats for senior riders.

TriShaw

Bike Racks – current locations, where are they needed? Social Media ask  
What is being done to facilitate these becoming more prevalent in towns?

Car Donations: who would benefit from this? Lakes & Pines, regional churches?  
Program in Alexandria called, Douglas County Car Care – learn more from them.

### Electric Car Stations:

(additional map)

This website has a national interactive map showing charging stations. <https://www.plugshare.com/>

*(Penny Simonson)*

These towns have charging stations in 7E:

- Hinckley,
- Milaca,
- Cambridge,
- Isanti,
- Vineland, and
- Isle.

### **Chisago County**

*(Kevin Stenson – Chisago County)*

Lindstrom is looking at placing a station on City owned land that's between their muni bar and liquor store.  
Details are still in process of being completed.  
Lindstrom's total cost for the station will be about \$10000.00 completed.

Chisago City's Kwik Trip has a car charging station.

### **Pine County**

*(Caleb Anderson – Pine County)*

To my knowledge the mapped locations in **Pine County** are all accurate.

They include:

Doc's in Sturgeon Lake

Grand Casino Hinckley

Tobies in Hinckley

Downtown Pine City

### **Mille Lacs County**

*(Penny Simonson & Genny Reynolds)*

The Grand Casino Mille Lacs has a charging station, as does South Isle Campground on MN47, just south of Isle. Those are the only two along the Lake Mille Lacs Scenic Byway.

The City of Princeton has one for free of charge.

The Teal Market in Milaca has one free of charge.

I don't know about Onamia?

### **Kanabec County**

*(Lindy Crawford – City of Mora Administrator)*

***We have not begun construction on either project area yet so I would wait to publish this until we are closer to the finish line, most likely this fall. However, if you have any questions please let me know.***

*Mora Municipal Utilities is in the process of installing electric vehicle (EV) charging stations. There will be two chargers, for a total of four charging ports, installed downtown Mora by the Klocka. These chargers will be the Level 2 Chargers which will take about 45 mins.-1.5 hours to fully charge a vehicle.*

*There will also be one DC Fast Charger, for a total of two charging ports, at Coborns. These will take approximately 30 mins. to fully charge a vehicle. We are still working through the legal agreements for this site and I don't foresee issues with that as many municipal utilities are working with Coborns on EV charging stations.*

Look Ma! No Hands!!!
