

Help shape the future of transportation in your community

Community Driven CAV Pilot Program

Do you face transportation challenges in your daily life?

Whether it's getting to appointments, running errands, getting to work or traveling where you need to go, we want to hear about your experiences!

The East Central Regional Development Commission and the Minnesota Department of Transportation (MnDOT) are working together to better understand how Connected and Automated Vehicles, or CAVs can help address transportation challenges in northern Mille Lacs and Kanabec counties. Join a listening session to help shape future transportation plans through MnDOT's Community Driven CAV Pilot Program.

Mille Lacs County Listening Session

Sold Out

Date: Tuesday, Oct. 6
Time: 10-11:30 a.m., lunch provided
Location: The Rolf Olsen Community Center (ROC),
807 Main St, Onamia

Kanabec County Listening Session

Date: Tuesday, Oct. 6
Time: 1-2:30 p.m., lunch provided
Location: Northwoods Steakhouse & RV Park,
2732 Hwy 65, Mora

A light lunch and refreshments will be provided for listening session participants. Please register by emailing karen.onan@ecrdc.org.

What are Connected and Automated Vehicles (CAVs)?

CAVs use technology to help vehicles interact with their surroundings and assist with driving. As communities look for ways to improve transportation, CAV technology may offer new options for connecting people to destinations and services, especially in areas where transportation can be challenging.
